

# Virtual Visits: Your Health is Our Priority

**As recommended by the Chief Medical Officer of Health, this health care practice now provides virtual visits to patients.**

Access your primary care provider team through virtual visits, while reducing the risk of spreading illnesses to you, other patients, and staff.

## **What to expect from a virtual visit:**

- Timely care for you and your family
- Private and secure consultation through phone, video or email
- Currently covered by OHIP with valid health cards
- Manage concerns that may not require an exam
- Screening to determine if an in-person appointment is required

**Contact your primary care provider if you have any questions.**

**1-800-922-0096**
